

26-Aug-2022 Team Meeting

Date: 26th August

Time: 2 - 4pm

Location: Tutorial Room, Zoom

Attendees:

- Edward
- Haoxin
- Ray
- Yifei

Agenda

- Discuss project details for part 2

Minutes

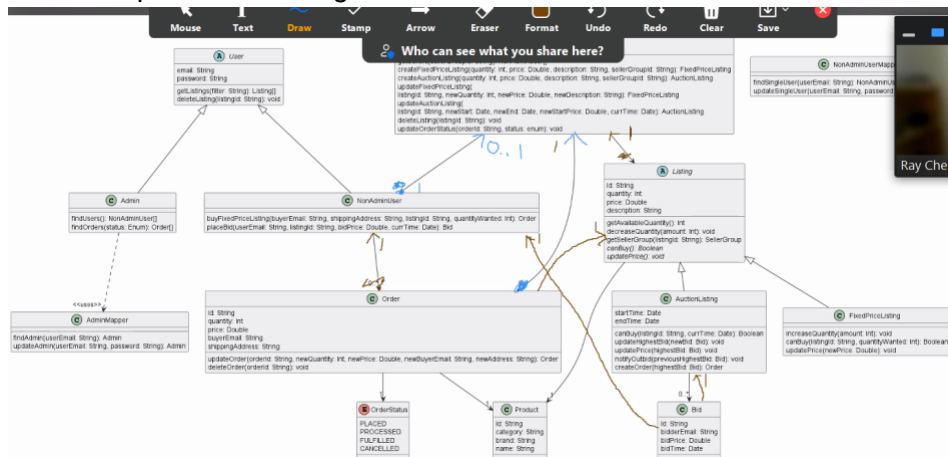

Decisions made during Team Meeting

- Generic interface for Mapper class, then each concrete class's mapper class implements the Mapper interface. Then the Unit of Work can just use the interface's method
- Only one unit of work class
- Identity map leave it for later
- Keep a history of bids for notification and cancel reasons
- User allow cancelling the bidding order once the bid has ended
- Having a Seller class which extends

Actions (TODO)

- Ask Luke for the ability to roll back
- Yifei: create all db table - there will be a script for us to set it up in us
- Edward, Haoxin and Ray: use the script to set up local database
- Edward: generate test pages

- Haoxin: Update class diagram

- Each of us: picks a domain and starts from the basic java classes + mapper classes:
 - User + NonAdminUser: Yifei
 - SellerGroup: Haoxin
 - Listing: Ray
 - Order: Edward
