

5-Oct-2022 Team Meeting

Date: 5th Sep

Time: 4pm - 6pm

Location: Zoom

Attendees:

- Edward
- Haoxin
- Ray
- Yifei

Decisions

1. Pessimistic lock -> write lock. We are OK with read inconsistency.
2. Controller will take of handling the lock
3. Try using lockmap instead of database to handle the locks (see code in Maria's example)
4. But how -> that's the question
5. No auth -> No time.

Ask Luke

1. Double check that Luke is OK with horrible user experience. -> Yep he is OK with it.

To do list

1. Testing -> We each test the ones we wrote
2. Implement the lock -> We each take some controllers + some via uow
3. Lock manager set up -> Ray
4. Fix button issue + Handle the case where the seller is cancelled. -> Yifei
