09-Sep-2022 Team Meeting

Date: 9th Sep
Time: 2pm - 5pm
Location: Tutorial

Attendees:
- Edward
- Haoxin
- Ray
- Yifei

Agenda
- Page transition confirm
- Integration - Done. All feature branches merged in to dev. Can continue development from there!

Decisions
- No confirmation box for delete functionality, for now
- No admin dashboard - just all the pages have
- Listing: only fetch the ones that still has not ended yet (for buyer)
- Shipping address: when a user register, they need to fill in shipping address. No more manual input on shipping address when user wants to place a bid/buy a fixed-price listing
- Cancelled order from Auction: order status become cancelled.
- Decrease/increase quantity for an auction. Sure.
- Price: Auction: overall? Conversion.
- Price: Fix-price: one quantity.
- For now: go with the simpler version - no connection between order and listings
- Question:
    - If a buyer increases/decreases quantities of an order, does that mean the listing from which the order is made, needs to reflect that change?
    - Can we make the restriction that an auction can only have 1 item
    - **Unit of Work**
    - **Identity Field clarification**
    - **Authentication - Spring Security**
-
