24-Aug-2022 Team Meeting

Date: 24th August
Time: 5:15 - 6:15pm
Location: Tutorial Room, Zoom

Attendees:
- Edward
- Haoxin
- Ray
- Yifei

Agenda
- Discuss part 1 feedback

Minutes

Tutorial Content
- None

Decisions made during Team Meeting

- Discussion on part 1 feedback
  - Should user registration be a use case?
    - Yes, user registration alone should be a use case, and we should include our assumption
  - Could we use composition in the domain model diagram?
    - This is not a database schema
    - It is a problem space that maps real word objects/problems into the model
      - Not an implementation of the database nor system
      - I.e., Admin should not have a password attribute
- Can we assume users are already in the system
  - yes, we just need to implement login functionality
-
Actions (TODO)
- Setup local database for the local environment
- Map domain model to Java classes diagram
- Database schema
- thymeleaf + Spring Security

- JSP
