12-Sep-2022 Consultation Meeting

Date: 12th Sep
Time: 2pm - 5pm
Location: Tutorial

Attendees:
- Eduardo
- Haoxin
- Ray
- Yifei

- Question:
    - If a buyer increases/decreases quantities of an order, does that mean the listing from which the order is made, needs to reflect that change?
    - Can we make the restriction that an auction can only have 1 item
        - Auction: just 1 quantity of the item. That's fine.
    - **Unit of Work**
    - **Identity Field clarification**
    - **Authentication - Spring Security**

Discussion

1. Will be tested: 20 items, Have to make sure we support concurrency.
2. Quantity has to be unique -> We need to do stock, just don't need to display.
    a. This can be a Unit Of Work. The final "Purchase" is when the database gets updated.
3. **Stock management -> on us**
